

SaxLocator 3 - 2002

Peter Smith

The last edition of The SaxLocator was published in 1999 and this third edition reflects catalogue details received in early 2002. The previous edition was a useful resource for many people to locate sources of plants and it is hoped that this edition is as useful. It is emphasised "out of stock" situations arise. Some nurseries have indicated that plants, (particularly fortunei) for which a limited demand exists, are propagated to order only. Also, some nurseries attend Shows and close for the duration of the Show. It is strongly suggested an advance telephone call is made prior to visiting nurseries to ensure they are open and stocks of material are available.

There is an increasing number of plants from Sections 4 and 5: Micranthes and Irregulares. There are over 300 new entries in this edition compared with the 2nd. These are marked. Besides many old established cultivars (some dating back to the earlier part of the last century), the "NEW" entries include many plants in the List of New "Kabschia" Cultivars compiled by Adrian Young and published in *The Saxifrage Magazine* no.8 (*Saxifrage 2000*). Also, there are many NEW entries from the Allendale stable.

Hybrid cultivars are given under their cultivar name, hence:

'Penelope' (x *boydilacina*)

with the relevant binomial given where appropriate. In the case of cultivars of species, the cultivars are listed under the species, hence:

paniculata 'Lutea'

It is hoped, therefore, that all cultivars of species are cross-referenced. No prefix or suffix has been added to some names. For example, *S. cochlearis* is variable and is listed only as *cochlearis* even though some nurseries have added 'Minor'.

The Saxifrage Society can not provide a warranty as to plant condition and correct naming of plants offered and supplied, nor subsequent cultural failure.

Where possible, invalid or as yet unregistered names have been indicated by an asterisk (*), but in case some have been missed, it is stressed that the names used are those given in catalogues and no view is here given regarding those except as noted previously.

For all the plants listed the section number according to the classification of Gornall (1987) is appended, i.e.

1. Ciliatae
 2. Cymbalaria
 3. Merkianae
 4. Micranthes
 5. Irregulares
 6. Heterisia
 7. Porphyron
 8. Ligulatae (Silver saxifrages)
 9. Xanthizoon
 10. Trachyphyllum
 11. Gymnopera (London Pride saxifrages).
 12. Cotylea
 13. Odontophyllae
 14. Mesogyne
 15. Saxifraga (Mossy saxifrages)
-
